Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The rejection based on U.S. Patent No. 5,234,447 to Kaster is withdrawn since Kaster does not disclose protuberances formed in the plate member.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 3, 5, 7, 8, 11, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,665,117 to Rhodes

Rhodes discloses a cylindrical body comprising a cylindrical body comprising at least one plate member with a plurality of protuberances (50). The plate member may be in the pattern of a zigzag, lattice, or rhombus (Column 6 lines 51-56).

4. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,500,517 to Buscemi et al.

Buscemi discloses a cylindrical body comprising a helical plate member (FIG. 4) with a plurality of protuberances (FIG. 8).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 2, 3, 4, 9, 10, 11, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,735,893 to Lau et al. in view of U.S. Patent No. 5,800,526 to Anderson et al.

Lau discloses a cylindrical body comprising a plurality of plate members connected by a plurality of connecting wires (FIG. 9,10). Lau discloses the claimed invention except for a plurality of protuberances formed on the plate member. Anderson teaches that protuberances are provided on the plate member in order to better grip the vessel in which it is implanted (FIG. 16, Column 12 lines 52-65). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Lau with protuberances in order to allow the device to better grip the vessel into which it is implanted.

Response to Arguments

7. Applicant's arguments with respect to claims 1-4, 11 and 15 have been considered but are moot in view of the new ground(s) of rejection.
